**TECHNOLOGY SOLUTION**

# V-KIOSK

A kiosk is a small physical structure (often including a computer and a display screen) that displays information for people walking by.

More sophisticated kiosks let users interact and include touch screens, sound, and motion video. A number of companies specialize in creating multimedia kiosks. A simple kiosk can be created using HTML pages and graphics, setting the typesize large enough to attract people from a short distance, and removing the Web browser's tool bar so that the display screen is effectively in "kiosk mode."

## More than Kiosks

### "CUSTOMER SELF SERVICE ANYTIME"

- New and effective customer service and marketing channel
